### **1 PROFESSIONAL EXPERTISE**

- Process expert at the food and feed industry
- Grain handling – receiving, conveying, storage, drying, de-hulling, cracking and flaking
- Solvent Oil Extraction – hexane, ethanol
- Solvent distillation
- Separation processes – centrifugation, filtration
- Protein extraction ethanol process
- Protein isolate extraction
- Enzymatic processes
- Industrial chromatography
- Extrusion – single and twin screw
- Packing and filling
- Drying – spray drying, belt drying and more
- Graining and milling by ultrarotor, stone mill, hammer mill and jet mill. Powder handling packing, conveying and coating
- Animal feed – meal (from oil extraction), acidulation of soap-stock to free fatty acids
- Edible oil refining – chemical and physical process
- Algae and water plant cultivation, harvesting, processing – extraction and drying

### **PROFESSIONAL EXPERIENCE**

#### **Co-founder – Rama processes ltd**

**2010 - Present**

Process engineering company specializing in design and build food processing plants.

Main projects in the algae, proteins oils and aggrotech field. Scaleup from the lab scale through pilot stage to processing plant.

#### **Owner - Technology Manager at Namshir food technology Ltd (Changed to Agrofood technologies Ltd)**

**2010 - Present**

Namshir Ltd is in the edible food industry in Israel for over 40 years. We have an experience and good knowledge with oil and seeds processing from the seeds receiving and handling, through solvent extraction, to the packing and distributing the refined oil, protein concentrate and isolate as well as all other related products. Namshir Ltd Has built four edible oil-refining plants and two complete plants from grain to oil meal and protein.

Namshir Ltd also involves in the algae industry: harvesting, processing – extraction and drying.

#### **Technology Manager – CTO – Hinoman LTD**

**2015 – 1/2020**

Develop new technologies for growing, harvesting and processing new innovative hydroponic crop from the family of Lemnaceae Duckweed.

Combining agriculture and industry methods to produce natural, high protein new food ingredient

#### **Technology Account Manager at Israbar - Oil & Grains**

**2012 - 2013**

Import and distribution of Edible oil and animal feed  
International trading, refined oil distribution globally.

### **Project Manager at Oleo Ltd - Edible oil refining facility**

**2010 - 2012**

Formulating Business plan, engineering planning, working with engineering companies and civil engineers,  
Coordinating with environmental and health authorities  
Defining production standards Building the QA of the company  
Plant erection from start to full working capacity

### **Co-founder and manager at Sun Oil LTD Oil processing and refining**

**2009 - 2010**

Formulating Business plan, engineering planning, working with engineering companies and civil engineers,  
Defining the production, marketing and sales goals.  
Working with global oil suppliers  
Coordinating with environmental and health authorities  
Defining production standards Building the QA of the company  
Plant erection from start to full working capacity.  
Developing a unique method of removing the wax from sunflower oil, eliminating the need for cooling and filtration.

### **R&D manager at Solbar Industries Ltd**

**2007 - 2009**

Developing R&D strategy, cooperating with academic institutes.  
Manager of the R&D lab and pilot plan.  
Team leader in the implementation of IPM - Innovative Process Management.  
Developing products in the extrusion, soy proteins and soy isoflavons.

### **Extrusion and isoflavon department manager and Process engineer. Solbar Industries Ltd**

**2006 - 2007**

Managing 25 workers at 24 hours production facility.  
Managing product production priorities and constraints.  
Die and barrel design for Wanger single screw extruder.  
Extrusion process engineer – maintaining constant production, under changing raw materials and production variables.  
Developing downstream processes.  
Drying by belt dryer and by spray dryer.  
Develop and execute industrial chromatography extraction process.  
Working with customers for developing custom made products.  
Implementing HACCP and ISO.

### **Process engineer isoflavon, SPI (soy protein isolate) and solvent extraction at Solbar Industries Ltd 2004 - 2006**

Operating and improving large scale hexane extractors and ethanol extractors  
Operating and improving Soy Protein Isolate water extraction plant.  
Operating grain receive process – de- hulling, cracking, flaking.  
Operating and improving large scale falling film evaporators  
Developing Ultra filtration and Reverse osmosis process for recapturing soy protein from whey water.  
Develop a method for extracting isoflavons from soy molasses using chromatographic resins, evaporation, and distillation and drying.  
Implementing the process into a full-scale production facility.

### **Process engineer FAB 18 at Intel**

**2001 - 2003**

Process engineer at the implant group responsible on the RTA (rapid thermal annealing)

## **POST GRADUATE TRAINING**

**Ben Gurion University, Israel**

1996 - 2000

M.Sc. at Chemical Engineering

**Ramat Gan - Edinburgh Business School MBA**

2007 - 2009

## **PERSONAL DATA**

DATE OF BIRTH: 20\12\1972

PLACE OF BIRTH: Israel

LANGUAGES: Hebrew, English (fluently)

MARITAL STATUS: Married. Proud father of three.
